# COVIDsure Multiplex Realtime RT-PCR Kit

The COVIDsure Multiplex Realtime RT-PCR Kit, is an open platform, qualitative, RT-PCR test, intended to be used for in vitro detection of SARS-CoV-2 (COVID-19) in respiratory specimens (nasopharyngeal swab, oropharyngeal swab, oropharyngeal wash, sputum, endotracheal aspirate, bronchoalveolar lavage etc.) of suspected cases of COVID-19 disease.

## Specifications

### Excellent Performance

High Sensitivity and Specificity

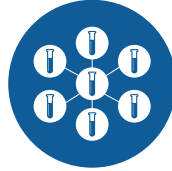

### Short TAT

Results available within 90 mins after extraction

### Specimens

Nasopharyngeal swab  
Oropharyngeal swab  
Oropharyngeal wash  
Sputum  
Endotracheal aspirate  
Bronchoalveolar lavage

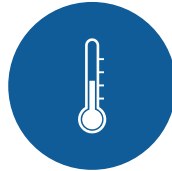

### MultiPlex Real Time RT-PCR for SARS CoV-2

nCoV ORF1ab, E and Human RPP30 Probes

### Patient Care

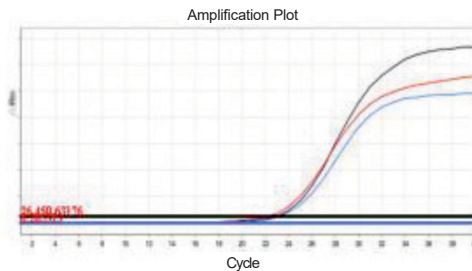

Accurate results to provide proper treatment

### Storage

-20°C

## Result Interpretation

**IVD**

\*Please note: Product specifications are subject to change without prior notice owing to product modifications, improvements / up-gradation.

### Marketed and Exported :
